

The Titanic sank - Who was to blame?

Assessment

Introduction .

This is a report on who was responsible for the sinking of the Titanic. This report will tell you the name of some of the people who led the Titanic disaster and how it ~~to~~ was their fault. My report will cover and the outcomes if these people weren't careless and too worried for 1st ~~class~~ class's needs, instead of their safety.

Also ✓

Captain's Smith's Ignorance .

~~Camp~~ Captain Smith was none other than the 'Captain' of the ship. People say that he was most to blame as being a captain doesn't come cheap but along ~~of~~ with the responsibility of all passengers. For a first, ~~he~~ he put the passengers lives at risk by speeding the ship upto 20 knots. ~~Perch~~ Perhaps if he slowed down the ship, they would've been able to avoid the crash and escape the danger easily instead of crashing. ✓

Another crime he committed was, Captain Smith ignored 7 messages which came through to him about an iceberg which they were heading towards. Maybe if he listened to the warnings, they wouldn't have crashed.

✓  
Good ~~the~~ instructions

## Thomas Andrews bad designs

Thomas Andrews was assigned assigned to design the Titanic. His way of making room for the 1st class was by reducing the amounts of watertights. The ~~watertights~~ were to hold the Titanic strong but ~~as~~ ~~reduced~~ because he reduced the number of ~~watertights~~, the ship was ~~not as strong as~~ it was supposed to be. The Titanic was supposed to be unsinkable and everyone blindly believed it. But due to Thomas Andrews bad ~~decision~~ decision the Titanic sunk. If he hadn't reduced the amounts of watertights, the Titanic could have crashed but nothing would have happened.

## Ship Builders poor quality of work.

The ship builders built the Titanic with poor quality iron. The material made the situation worse. If the ~~builders~~ builders built the Titanic with strong iron, they then there may not have been a hole on the ship and the ship wouldn't have filled with water, drowning everyone.

## Captain Lord's nap time.

Whilst the Titanic was in catastrophe, Captain Lord ~~was~~ (Captain of the Californian ship) was having a nap. Despite witnessing all the bright, loud fireworks coming from the Titanic, Captain Lord went back to ~~sleep~~ sleep thinking they were having a ~~nap~~ party. If he looked closely, he would've seen that everyone on board on the Titanic was in danger and could've gone to their ~~rescue~~ rescue and saved more lives.

## Selfish Bruce Ismay

Bruce Ismay was desperate to break the world record and risked everyone's life forcing Captain Smith to stire the ship faster and faster. Also he ~~reduced the~~ got rid of most of the life boats which made it even more difficult to save everyone on board. Maybe if Bruce Ismay kept all the life boats on the Titanic, they would've been able to get it not all ~~passengers~~ but most passengers off board.

## Conclusion.

~~Overall~~ Overall, this report covered how and why these fellow men ~~caused the~~ caused the Titanic to sink and how it was their ~~fault~~ fault that many ~~passengers~~ passengers died because of their selfish or wrong decision.

## Recommendation.

In my opinion, Bruce Ismay and Captain Smith were most to blame as speeding the ship was the reason to why the Titanic sunk ~~and~~ at the bottom of the ocean with most of the passengers on it.
